**SCHOLASTIC ACHIEVEMENTS/PROJECTS/PUBLICATIONS**

**Portfolio Site**

**August 2023 – September 2023**

I have developed a personal portfolio website using HTML, CSS, and JavaScript, designed to showcase my skills, experience, and projects. This platform serves as a central hub for potential employers and collaborators to explore my work and connect with me.

- Interactive Resume: My portfolio website includes a downloadable CV section, allowing visitors to easily access and download my up-to-date resume.
- Contact-Me Section: Visitors can reach out to me directly through the 'Contact-Me' section, making it effortless for networking, collaboration inquiries or general communication.
- User-Friendly Navigation: The website is intuitively designed with user-friendly navigation, ensuring a smooth and enjoyable browsing experience.

**Django Marketplace -- An E-Commerce Website**

**May 2023 – June 2023**

An e-commerce website which provides an immersive online shopping experience, enabling businesses to showcase and sell their products to a wide customer base. This site offers seamless navigation and a robust product management system.

- User Registration and Authentication: Customers and Vendors can create accounts, log in securely and manage their profiles for a personalized shopping experience.
- Shopping Cart and Checkout: Users can add products to their cart, review their selections and even avail discounts using coupons.
- Admin Dashboard: The website includes an intuitive dashboard for business owners to manage products, inventory, generate reports on purchase etc.

**Blogging Website****March 2023 – April 2023**

Built a dynamic and user-friendly blogging website that provides a platform for users to create, publish and share their thoughts and ideas through engaging blog posts.

- Blog Creation and Management: Registered users can easily create, edit and delete their blog posts using a simple and intuitive content management system.
- Commenting System: Visitors can leave comments on blog posts, encouraging interactive discussions and feedback.
- Responsive Design: The website is built with a responsive layout, ensuring optimal viewing and interaction across different devices.

**Library Management System****December 2022 – January 2023**

Built a library management designed to handle various tasks including cataloguing books, borrow and return of books and generating reports on all the book available. This a robust and user-friendly system that ensures seamless library operations.

- Book Catalogue: Efficiently manage and organize a vast collection of books with detailed information.
- Search and Filtering: Implement a powerful search functionality, enabling users to find books based on titles, authors etc.
- Report Generation: Generate comprehensive reports on book circulation and inventory status to facilitate informed decision making.
